SWATI JAISWAL

Senior Backend Engineer | Microservices, Python, Golang

swatij.me **linkedin.com/in/curioswati** **github.com/curioswati**

SUMMARY

Senior backend engineer with 7+ years of experience building scalable, distributed systems in Python and Golang. Strong focus on system design, clean architecture, and performance optimization, with expertise in building high-throughput, low-latency APIs. Proven ability to drive technical direction, influence engineering standards, lead cross-functional initiatives, and deliver resilient, observable systems in production SaaS environments.

SKILLS

Languages: Python, Golang, HTML, CSS, SQL, Bash, JavaScript
Backend: Gin, Django, Flask, Microservices, REST APIs, Web Hooks, Queues, Bulk Processing, Clean Architecture, TDD
Cloud & DevOps: AWS, GCP, Docker, Kubernetes, Nginx, Gunicorn, Observability and Monitoring, CI/CD Pipelines
Databases: MySQL, PostgreSQL, Redis, MongoDB, ArangoDB, ElasticSearch (data modeling, indexing, query optimization)
Data: Pandas, Airflow, ETL, EDA, BeautifulSoup, Scrapy, Apache Superset, Altair
Leadership: Technical Leadership, Mentorship, Code Reviews, Cross-functional Collaboration

EXPERIENCE

Signeasy — Bengaluru, India

Lead Software Engineer | Backend — *Jun 2024 – Present*

- Led the end-to-end design and delivery of a Drive like service — a core CLM feature integrating with multiple back-end microservices, architecting the data model in **ArangoDB**.
- Implemented a scalable download system using asynchronous workflows and **Apache Airflow** for batch processing, improving efficiency for large file operations.
- Leveraged **Go concurrency** patterns to handle background tasks and optimize system performance for low-latency processing. Integrated content search capabilities using ArangoDB's search for efficient and relevant document retrieval.
- Owned deliverables end to end, shaped architecture decisions and mentored juniors.

Senior Software Engineer | Backend — *May 2022 – May 2024*

- Redesigned two core microservices using **Clean Architecture** and refactored DB schema, improving performance by **~2x** and ensuring scalability using **Gin-gonic, MySQL, Redis, SNS, SQS, Lambda**.
- Migrated legacy services to modern architecture, reducing technical debt and improving deployment velocity by **~80%** using **Flask, Docker**.

Software Engineer | Backend — *May 2021 – Apr 2022*

- Built automated SharePoint file archiving system, using **OAuth2, MS-Graph API, AWS Lambda, SNS**, which became a **key selling point** for the product.
- Implemented data transformation pipelines, using **Airflow**, to democratize usage metrics, boosting the marketing team's efficiency.

CivicDataLab — Remote, India

Civic Tech Engineer | Full Stack — *Oct 2018 - Jun 2020*

- Led the team and built an open data platform for legal data sharing, with **~10** data contributors from various legal institutions across India using **CKAN, Python, Javascript, Bootstrap**.
- Built a scalable ETL pipeline to scrape case law data from eCourts across **~300 district courts** in India with **~100k cases** and for Himachal Pradesh Fiscal Data Explorer's **80k+ records** both updated on a daily basis using **Scrapy, Airflow**.
- Co-developed **Analytical Dashboards** for legal data related to Child Sexual Abuse in India using **Pandas, Apache Superset**.
- Contributed to hiring process for backend roles, co-authored project proposals, participated in partner organisation meetings, and wrote blog posts to communicate project outcomes.

Scrapinghub

Remote, Europe

Junior Python Developer — *Jul 2017 - Jul 2018*

- Built resilient web scraping systems for enterprise clients bypassing **anti bot systems** like Incapsula, Captcha, APIs, javascript etc using **Scrapy, HTTP Request-Response inspection**

Doselect

Bengaluru, India

Hacker Intern | Backend — *Jan 2017 - Mar 2017*

- Developed a webcam proctor for recruiting tests using **openface, dlib, Google Vision API**.
- Wrote API for Doselect's programmer QA forum using **Tastypie**.
- Built the test creation wizard for client companies' programming tests using **ElasticSearch API, django-haystack**.

ACHIEVEMENTS AND OPEN SOURCE

- **Outreachy (May–Aug 2016)** — Selected for a competitive open source internship program for underrepresented groups in tech.
- CPython(2015): Two patches merged: #25913, #25822.
- Python Express(2015-16): contributed to **PSSI sponsored** open source platform for conducting & managing Python workshops; with **over 50 merged commits**.
- Openbudgets.in(2016): contributed to **CBGA driven** open data portal for **analysing budgets in India**.
- Speaker - ODSC India 2019: ***"Fantastic Indian Open datasets & where to find them"***; PyCon India 2016: ***"How to get started with open source"***
- Publication: Prajapat et al. (2018) Generalized Parametric Model for AVK-Based Cryptosystem. In: Perez G., Mishra K., Tiwari S., Trivedi M. (eds) Networking Communication and Data Knowledge Engineering. **Lecture Notes on Data Engineering and Communications Technologies, vol 4. Springer, Singapore**. https://doi.org/10.1007/978-981-10-4600-1_20
- More here: **workshops/talks** , **projects**

EDUCATION

M.Tech in Information Technology (Integrated)

CGPA: 8.69/10

Devi Ahilya Vishwavidyalaya, Indore, India — *Jul 2012 - Dec 2017*
